Application No. 09/582,634
Filed date: Sep. 13, 2000

Geneva on 15 Sep. 2004

Sub. / reliable edition

Dear Sir(s),

Referring to the granted petition for this application dated Aug. 24, 04 and related to the long terms of prosecutions which faced circumstantial difficulties since 2000.

I would like to draw the attention on the reason behind the long text matter which aimed to facilitate the whole sectors and performance of the new system represented by this engine.

While during the past terms, revised editions been submitted according to your notes and recommendations, the last edition had been sent (registered) to you on replying your previous office action at Jan 23, 03 accompanied with the required marked up copy.

The revision was done to improve the wording of a text matter in the meantime included a necessary related paragraph under a name of "This engine in summary" (on pages 41- 43) to provide the brief and precise description on this (engine) device to make this relevant text matter suits the regulations of USPTO that was according to your repeated demands.

This brief description is using details of the same unchanged set of application's drawings and certainly there is no new subject on the submitted revised application.

This is to provide a sufficient explanation to distinguish most compositions of this engine easily with a declaration on its general typical performance in order to meet USP regulations and to allow any normal person to understand the details.

This relevant paragraph could be chosen by the examiner for the publishing purpose since it would substitute the long text matter with regard to introduction, abstract and claims for the matter of publishing this application.

However, the assigned patent attorney for (a petition-request) has amended the abstract and the claims on his way of legal practicing before USP to make this application complies to the regulations of USP to improving the final version of this application meanwhile to reserve the long term efforts of such precise declarations done by the applicant.

This edition certainly was submitted to be recognized as the final and reliable current edition on this application for processing of continued examination on this application.

Looking forward to have your comprehensive recognition on this long effort.
Best regards

The applicant,
Sincerely,

Shirwan AL PASHA AL BAHDAINI
